Dear FDA:

I am writing this letter to urge you to act on Docket # 99P-4613 which would ban the use of genetically engineered Bovine Growth Hormone on dairy cows. This bill would prevent the use of unhealthy and inhumane BGH on dairies. This bill would prevent infections and suffering in cows. Experts on both sides agree that the effect of the use of both BGH and of genetically engineered organisms on humans is unknown and could be potentially dangerous. In addition, most consumers, when informed about the use of BGH in cows, or the use of genetically engineered organisms, state a preference for food without it.

Thank you for your consideration of this issue.

Sincerely,
Dawn Mallow
